

ED Service Registration Form

Return form to **IRM**; mail code 214 or fax 231-8649

The Enterprise Directory (ED) is a centralized system that provides mechanisms for PID/password authentication and lookup of person identity information for the purpose of service authorization and customization. Services, applications that wish to use the ED system, must register with IRM, the sponsoring authority for the ED system.

Basic Service Information

Service ID: _____

Service IP Address(es): _____

Service Type: Personal Private

Description of Service: _____

Service Contact Information

Responsible Party

Name: _____

PID: _____

Department: _____

Office Phone: _____

Technical Contact

Name: _____

PID: _____

Department: _____

Office Phone: _____

Service Privileges: Authentication

Authentication privilege allows a service to verify that a user's PID and password is correct and that the PID is currently active.

PID/Password Authentication

Service Privileges: Authorization & Customization

The following LDAP attributes may be used by a service to perform authorization checks that ensure the user may access all or part of the service. They may also be used to customize the user's experience within the service once the user has been authenticated and authorized.

Certain fields are given to every service and are already pre-checked. Currently unpopulated attributes are NOT listed nor are attributes with very special restrictions (such as userPassword).
